Technical Skills

Systems And Low-Level Skills:C, C++, Data Structures And Algorithms, Operating Systems, Compiler Design

CS Fundamentals:Database Management System, OOPs

Web Development: HTML, CSS, Javascript

Frameworks/Libraries: Bootstrap, Tailwind CSS, Node.js, React.js

Database: MongoDB , MySQL

Developer Tools: Visual Studio Code, Git, Github, Postman

Soft skills: Event Management, Communication

Projects

CPU Scheduling And Process Simulator

- Implemented a custom simulator for OS scheduling algorithms (Round Robin, FCFS, SJF) using C++.
- Analyzed context switching, turnaround time, and CPU utilization.
- Tech stack used : C++

Crime Prediction And Analysis

- Developed a scalable ML-driven crime prediction system by integrating a Flask-based Python model with a Node.js backend, enabling real-time crime forecasting through efficient API communication and clean data flow
- Implemented secure JWT authentication, modular service structure, and optimized prediction handling while ensuring smooth interaction between the ML service, backend, and React-based user interface.
- Tech stack used : **React, Vite, TailwindCSS, Node.js, Express, MongoDB, JWT, Python (pandas, scikit-learn), Flask, Axios.**

Blogging Platform

- Built a full-stack content management system emphasizing efficient backend data structures, API design, and secure authentication workflows.
- Used Appwrite BaaS with React to implement low-latency CRUD operations, user identity management, and optimized storage handling.
- Tech stack used : **React, Vite, Redux Toolkit, Appwrite, Tailwind CSS, TinyMCE**

Achievements

- * Secured 1st position at robotics workshop.
- * Completed 200+ questions on Leetcode.
- * Completed C++ and DBMS course on Codechef.
